

aquaBUBBLER

COMPACT WATER COOLER

This is a very powerful compact water cooler that will supply 16 litres of cold water per hour.

It has a 3 litre stainless steel water storage tank, designed so that the tank can be backwashed to remove any sediment build up that may have entered the storage tank.

Designed with rounded edges to prevent restriction of air flow in condenser if in a confined space.

The nuts, bolts and screws are stainless steel with stainless steel side panelling. Can be connected to mains water supply or a low pressure filtration system.

The water connection is 1/4" BSP inlet and outlet, recessed below top and bottom of water cooler to protect water fittings.

Description/Features:

Water Supply:	Mains Water Connection
Dimension (mm):	290W x 485D x 320H
Weight:	21 kgs
Cooling system:	Refrigerant R134a
Power supply:	220 / 240 Volt, 50Hz, 1PH
Warranty:	1 Year
